

DANIEL MEIRELES AQUINO JORGE

FULL STACK DEVELOPER

daniel.meireles.pro@gmail.com (31) 99711-1572 Mário Campos, MG linkedin.com/in/danielmeirelesdev
danielmeireles.dev github.com/DanielMeirelesSi

PROFESSIONAL SUMMARY

Full Stack Developer experienced in building web applications, REST APIs, and service integrations with React, TypeScript, Node.js, NestJS, C#, and ASP.NET Core. Skilled in relational and non-relational databases, authentication with JWT and OAuth 2.0, containerization with Docker, and responsive interface development. Focused on delivering complete, well-organized, and easily maintainable solutions.

SKILLS & COMPETENCIES

Frontend: React, Next.js, TypeScript, JavaScript, Vite, React Router, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express, NestJS, C#, ASP.NET Core Web API

Databases & ORMs: MySQL, MongoDB, Entity Framework Core, Mongoose

Libraries & Visualization: Axios, Recharts

APIs & Integrations: REST APIs, Webhooks, OpenAI API, Gmail API, WhatsApp Cloud API

Authentication & Security: JWT, OAuth 2.0, bcrypt, route protection, per-user data isolation

DevOps & Tools: Docker, Docker Compose, NGINX, Vercel, Git, GitHub, Linux/WSL, Postman, Swagger/OpenAPI

Additional: Responsive design, problem-solving, process analysis, technical documentation, and teamwork

PROFESSIONAL EXPERIENCE

Technician & Customer Support
Mega Point Cell

May 2020 - July 2026

- Managed daily operations and inventory control, improving administrative processes.
- Handled finances and payment tracking, ensuring accurate records.
- Identified and implemented internal technology improvements to boost operational efficiency.
- Delivered technical support and customer service, resolving issues quickly.

EDUCATION

Pontifícia Universidade Católica de Minas Gerais - PUC Minas - Betim
Bachelor's Degree in Information Systems

01/2025 - 12/2028

RELEVANT PROJECTS

+Grana | Financial Management System

- Built a full-stack personal finance system with a dashboard and expense and goal tracking, using NestJS, React, MongoDB, and Docker.
- Developed the frontend interfaces for data visualization and management, fully integrated with the backend REST API.
- Implemented JWT authentication, per-user data isolation, and protected private routes.

Gmail Agent WhatsApp | Email Assistant

- Created an AI-powered email assistant with Node.js and Express that reads and summarizes Gmail messages through commands sent via WhatsApp.
- Integrated the WhatsApp Cloud API, Gmail API with OAuth2, and OpenAI, including the authorization flow and data persistence.
- Configured the project for deployment with environment variables and a persistent volume.

KM Control | Vehicle Management System

- Developed a web system to manage vehicles, refueling, and costs, with a dashboard for fuel consumption, cost per kilometer, and usage history.
- Built the backend in C# with ASP.NET Core and Entity Framework Core, connected to an interface made with HTML, CSS, and JavaScript.
- Added filters, record editing, monthly indicators, and a live demo published on the web.

CinemaTicketsAPI | Ticket Sales API

- Built a REST API in C# and ASP.NET Core for ticket sales, with session control and prevention of duplicate purchases.
- Structured the code into controllers, services, and DTOs, with documentation and testing through Swagger.

LANGUAGES

English: Advanced. Technical reading and writing; intermediate conversation.

RECOGNITION

2nd Place - Interdisciplinary Project: Web Applications | PUC Minas Betim (2025)

+Grana, a full-stack web application built as a team, awarded 2nd place among the projects presented in the course.
